

# X-Payments: Payment gateways supported by X-Payments 2.2

The table below provides a list of payment gateways supported by X-Payments 2.2.

**Legend:**

- **Auth:** Allows to authorize the availability of funds for a transaction (The buyer's funds are temporarily placed on hold to ensure the availability of the authorization amount for capture).
- **Capture:** Allows to capture the amount of the authorization (The money authorized for the order is moved from the buyers's account to the merchant's account).
- **Sale:** Supports transactions of 'Sale' type (Authorization and capture actions are completed simultaneously at the time the payment is processed).
- **Void:** Allows the removal of an authorization hold from the buyer's account by the merchant.
- **Refund:** Allows to issue refunds (The money is returned to the buyer's account).
- **Get Status:** Can provide information about the status of a transaction to X-Payments.
- **Accept, Decline:** Allows to accept or reject transactions with a higher likelihood of risk.
- **Test:** Can test whether the merchant account details entered in X-Payments are valid.
- **Test:** Can test whether the merchant account details entered in X-Payments are valid.
- **3D-Secure via Cardinal Commerce:** Supports 3-D Secure payer authentication via Cardinal Commerce.
- **Tokenization:** Supports tokenization (Allows to charge customer credit cards again - without X-Payments storing cardholder data).
- **p:** Supports partial transactions (For example, "Capture + p" = Allows to capture a partial amount of the authorization).
- **m:** Supports multiple transactions (For example, "Capture + m" = Allows to perform the capture action multiple times).

Payment service provider	Payment system	Sale	Auth	Capture	Void	Refund	Get status	Accept	Decline	Test	3D-Secure via Cardinal Commerce	Tokenization
PayPal	PayFlow Pro	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> + p, m	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> + p, m		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		3d Secure built in	<input checked="" type="checkbox"/>
